(916) 226-9322

Redding CA - A WWWsome Net Services will be demonstrating Reading's first Satellite-Dish based Internet Access at the Northern California Business Expo 1996 at the Redding Convention Center on October 17th. Using a small (21" dish) receiver, DirecPC provides high-speed Internet Access to North-State homes and businesses, at significantly lower cost than is currently available through traditional hard-wired phone systems. In addition, this system expands high-speed Internet Access to outlying areas that currently have no other choices available.

This satellite-based system grabs the data your request off the Internet, throws it 22,300 miles into space to a satellite, bounces it back down to a 21" dish on your roof, and shoots it straight into your PC. At speeds up to 400,000 bps - 28 times faster than the average high-speed modem! Downloads that took hours now happen in minutes. "I personally downloaded a 10mb program in 8 minutes that previously took almost 2 hours through my 28.8k modem" said Michael Saccomano, Marketing Director for A WWWsome Net Services. "I was impressed!"

Built by Hughes and available from Nor-Cal Satellite Emporium here in Redding, the system comes complete with installation and unlimited-use Internet Access from A WWWsome Net Services. Pricing will be available, and reservations taken, at A WWWsome's booth (#4) at the Northern California Business Expo 1996 on October 17th.

AWWWsome Net Services provides high-performance Internet Access, Internet Development Services and Web Page Hosting to North State Businesses and Professionals through it's state-of-the-art facilities at 833 Mistletoe Lane in Redding California. Home of the popular *virtual Redding* Web Site, AWWWsome can be reached by phone at (916) 226-9322, and on the Internet at <http://www.awwwsome.com/>

Notes to Editor:
